Keep Your Office or Home Cool, New and Safe

Improve the quality of your life by keeping out uncomfortable heat, protecting your furnishings and letting in the view you love with Solar Gard® Panorama® Hilite® spectrally selective window film.

The latest and most innovative film from Solar Gard is Panorama Hilite which gives you an exceptional combination of protection and peace of mind. Because it is spectrally selective, Hilite offers you unique performance advantages that maximize the benefits of sunlight while blocking the harmful rays. Hilite also features the highest levels of optical clarity, conveys maximum visible light and is non-reflective. Your home or commercial building is more comfortable without overloading your air conditioner, providing impressive energy savings. Light-sensitive furnishings, floors and artwork are shielded from heat and harmful ultraviolet rays. And Hilite is virtually invisible on your windows so your views are as beautiful as ever.

Hilite is also offered with the additional choice of safety and security features in a film that keeps the elements and intruders out while holding shattered glass safely in place. You get all the benefits of Hilite film plus the advantage of impact protection. This powerful film out-performs other brands in the unbeatable combination of solar protection and safety.

Film performance for Hilite® 70 window film

Keep it cool

Hilite blocks more than half of the total solar energy from the sun from entering through the windows, so you are far more comfortable while you enjoy the natural light. By controlling solar heat, Hilite eliminates uncomfortable hotspots and uneven temperature fluctuations. You'll be using your air conditioning less, which means less energy consumption and a smaller utility bill. And indoor temperatures become cooler and more comfortable.

Keep it new

The same windows that create an inviting ambiance with light can also fade your furnishings and increase your exposure to UV light. Keep your interiors vibrant and new longer with Hilite. Hilite rejects 99% of the ultraviolet rays, protecting expensive curtains, hardwood floors, rugs, furniture and valuable artwork from fading and discoloration. Because Hilite protects from harmful UV rays, it can help to prevent certain forms of skin cancer and is recommended by the Skin Cancer Foundation.

Keep it safe

Beautiful as they are, windows can also pose a threat:

- The kids' playing catch on the front lawn
- A severe storm pummels your office building or home
- A thief tries to gain entry into your home or business by breaking through a window

Hilite comes in a safety version that keeps shattered glass safely in place when a window breaks from a deliberate or unintentional impact. People and interiors are protected from flying shards and break-ins are effectively deterred.

Easy installation and maintenance

Hilite is professionally fitted by a global network of trained and certified dealers. Our certified Solar Gard technicians install the film to the inside of your existing windows quickly and easily, so disruption to your business or household is minimal. You can clean window film as you would untreated windows for worry-free maintenance.

Get the clear performance advantage

Hilite provides a distinctive combination of high solar heat rejection, high visible light transmission and low reflectance. These high performance and energy-saving benefits make Hilite the preferred film among office or building managers and homeowners. You can also choose Hilite film with all of these benefits plus safety and security features.

Comprehensive warranty

When you choose Hilite, your purchase is backed by a comprehensive warranty package. Your authorized dealer will provide you with complete warranty details and documentation.

A Solar Gard product

Panorama Hilite is manufactured by Solar Gard a global leader in environmental stewardship that actively practices energy efficiency throughout the manufacturing process. Solar Gard is a designated provider in the Clinton Climate Initiative, helping people, businesses and governments around the world save energy and diminish CO₂ emissions by installing window film on their homes and facilities.

Choose to keep your home or office building cool, new and safe with Panorama Hilite spectrally selective window film. Contact your Solar Gard elite dealer today to discuss installation for your home or business.

Hilite is only available through an authorized Panorama Dealer.
